TECHNICAL SKILLS

Languages & Core: C, C++, JavaScript, SQL, HTML/CSS, OOP

Web Technologies: React.js, Node.js, Express.js, MongoDB, REST APIs, Tailwind CSS

AI & Machine Learning: Generative AI, LangChain, LangGraph, RAG, GraphDB

Concepts: DSA, Computer Networks, Operating System

Tools: Git, Github, PostMen, VsCode, Docker

PROJECTS

NewsMint-Daily Digest Sender | *React, MongoDB, Redis, Express.js, Gemini AI* | [Details](#) | [Live-Demo](#)

- **AI-Powered Personalization:** Built a full-stack news platform that collects articles from multiple APIs and RSS feeds, removes duplicates, and generates concise English and Hindi summaries using Google Gemini.
- **Automated Processing:** Designed scheduled background workflows for news fetching, AI summarization, user-preference filtering, and timezone-aware personalized digest generation.
- **Secure Delivery:** Implemented JWT/OTP/Google authentication, Redis caching, Telegram account linking, and automated delivery of personalized news digests through Telegram.

HaqDar Government Schemes Finder | *MERN stack, Pinecone, Gemini AI, Redis* | [Details](#) | [Live-Demo](#)

- **AI-Powered Matching:** Built a government-scheme recommendation platform that converts user eligibility profiles into embeddings, uses Pinecone for semantic search, and uses Google Gemini to re-rank and explain relevant schemes.
- **Scalable Architecture:** Designed separate services for schemes, profiles, recommendations, and feedback, with MongoDB for persistent data and Redis caching to avoid repeated recommendation calls and improve response speed.
- **Optimization:** Reduced API latency by implementing hierarchical caching strategies and database indexing.

UniFetch Media – Personal Media Downloader | *MERN stack, Web-Socket, YT-DLP, FFmpeg* | [Details](#) | [Live-Demo](#)

- **Media Downloading:** Built a personal media downloader that lets users paste or auto-detect URLs, preview media details, select quality and format, and download media in the background.
- **Background Processing:** Implemented a download queue using yt-dlp and FFmpeg with live download progress, speed, ETA, retry, and pause/resume functionality through Socket.IO
- **User Management:** Added OTP email verification, Google OAuth, JWT-protected routes, download history, media library, favorites, notifications, and user preferences using MongoDB and Redis.

EDUCATION

Jaipur National University (JNU)

B.Tech in Computer Science Engineering; CGPA: 8.0

Jaipur, RAJ

Jul 2024 – currunt

Darul Uloom Faizan-E-Ashraf (DFA)

Higher Education 10+2th PERCENTAGE; 85.80%

Nagaur, RAJ

Jul 2022 – Apr 2024

ACCOMPLISHMENTS

DSA Proficiency: Solved **300+** problems.

Certifications: C++, GenAI, Tech Fundamentals. [View](#)
